MOL announces improved service from RSA to USA

MOL is pleased to announce the launch of an improved and more frequent service from RSA to USEC and USWC. Our bi-monthly service ex South Africa has been increased by one more departure, now providing 3 sailings ex RSA to US each month since 1 of May 2010. The service runs on fixed loading positions in RSA and provides great flexibility due to multiple transshipment options in Europe and shorter transit times.

MOL has deployed some of the world's newest built Pure Car and Truck Carriers (PCTC) in the trade, with superior capabilities to carry high & heavy cargo.

MOL – smoothing the waves of information flow.
